Note: Racially identifiable school within a district means a school where the enrollment of protected students at the school within a district is more than 20 percentage points above the enrollment of protected students in the entire district for the grade levels served by that school. The issue of concentrations of American Indians student as addressed in Minn Rules 3535.0100 subpart 1 B (1) was handled using the following logic.

If the percentage of American Indians in a School is greater than the percentage of all other protected groups combined, then the difference was calculated as follows:  
((School minority enrollment – School American Indian enrollment) / School total enrollment) – (District minority enrollment/ District total enrollment)  
Else  
(School minority enrollment / School total enrollment) – (District minority enrollment/ District total enrollment)

This report was produced using October 1 MARSS data.

\* District % Protected is computed using the sum of the enrollments at all other traditional schools in the district and the same grades as provided at the identified school.
